

## Agility can help you in many areas.

### *Additional Services for Both Sides of Your Brain.*

Situation	Service
<p><b>The Message Isn't Getting Through</b> You have plenty of ideas and concepts. Some of them may even be brilliant. But the message is getting lost somewhere in the delivery process.</p>	<p>Our <b>Maximized Understanding Program</b> solves this problem. Whether the aim is to create a manual, specification or handbook, we'll help you maximize understanding.</p>
<p><b>The Gap Between Business and Technology Is Too Wide</b> There are technical people and there are business people. Neither understands the issues of the other. Solutions are either too complex or misaligned. How do you fix this?</p>	<p>You need someone who can bridge the gap between technical details and business needs. Our <b>IT Business Analysis Program</b> provides answers both sides will embrace.</p>
<p><b>Software Is Too Expensive</b> You keep hearing about Linux and the open source movement. What are they all about? Can they really help your business while saving you money?</p>	<p>In a word, yes! Our <b>Open Software Program</b> will tell you what open source software your business can use and how much it will save you in time and money.</p>
<p><b>Low Return On Investment</b> You have plenty of computers and software but they're not providing the value you think they should. There's still a lot of manual processing going on.</p>	<p>Check out our <b>Workflow Effectiveness Program</b>. You don't need to buy more software. You need to use what you have more effectively.</p>
<p><b>Under-Utilized Website</b> You have a website (doesn't everyone?). But it's not clear that the site provides any real value to your business. In fact, it may be hurting more than helping.</p>	<p>A bad website is worse than no website. Our <b>Website Effectiveness Program</b> will show you where your site falls short and what you need to do to fix it.</p>
<p><b>Persistent Technology Issues</b> You have more hardware and software than you know what to do with! You keep spending money but nagging problems persist.</p>	<p>Check out our <b>Technology Value Program</b>. You need to know what you have and how it's used. Then you can apply it effectively.</p>
<p><b>Help Desk Not Helping</b> Maybe you need to set up an IT Help Desk function or perhaps the one you have is just not getting the job done to the satisfaction of your business workers.</p>	<p>Read about our <b>Help Desk Program</b>. Running an effective IT Help Desk is a tough job. We can show you how to keep support costs low and make your Help Desk shine!</p>

## More Brain Power Focused On Your Business!

We can help you **resolve the toughest information technology issues** by providing concrete results that:

- *Maximize understanding* by transforming ideas and concepts into useful written content,
- Translate information technology into *business results*,
- Cut software costs by migrating portions of your business to *open-source software*,
- Reduce the cost of daily operations through improved *workflow* effectiveness,
- Extract maximum value from your *website* by focusing on the needs of people using it,
- Get more out of your existing computer systems by finding more *technology value*,
- Make your *help desk* more effective in dealing with information technology problems.

After we meet, you'll receive a proposal tailored to your situation and designed to provide maximum value to your business.

Our approach is **collaborative**. You know your business and your people. We know information technology and how to explain it. **Together**, we can be a great team.

The advice we provide won't be vague and abstract. It will be **concrete and actionable**.
